

## Typing in Harari

The Harari keyboard (ፊ) provides *only* the letters used in Harari. It uses a system whereby the Harari sounds are matched to the English letters (a style called “phonetic”). You can think of how a word sounds in Harari and then type it out with English.

Example: typing **selam** becomes ስላም

Because Harari has more sounds than English we sometimes have to adjust this rule. For example English does not have ‘m’ and the closest similar letter would be ‘t’. In this case you should type with “capital T”:

Example: typing **TienaysTIN** becomes ተናይስቲን

When the letter you want to type does not appear when you hit the similar sounding key in English, try using the capital next. If typing the capital does not work, then try hitting the key two times:

Example: typing **sselam** becomes ሪላም

Example: typing **SSeHey** becomes ይሕይ

Next, when you need to type the extra letters of used by languages like Amharic, for example አ, ግ, ኃ, etc., you can do so by typing an extra vowel after a ‘u’:

Example: typing **lua** becomes ለ

Example: typing **mua** becomes ሙ

Finally, we must introduce a special rule for ' (apostrophe). Some words are spelt with a እኩለ (6<sup>th</sup>) letter followed by a vowel, like **ርከ** in **የብርከል**. We use the apostrophe here to type “gebr'iel” to make sure we get “**ርከ**” instead of ‘**ራ**’.

Example: typing **mel'ak** becomes መልክ

Example: typing **m'eeraf** becomes ምዕራፍ

If an apostrophe, ', is needed after a እኩለ letter in your document, type it twice like:

Example: k" to produce ከ'

The following typing tables show how to type all Harari letters, numbers and punctuation.

## Harari Typing Table

ԱՆԴՐՈՒ	ՊԵՇԻ	ԻՆԴՐՈՒ	ՄԱՆՈՒ	ՀԱ-ԱՆԾ	ՀՅԱՆԾ	ՂԱՆԾ	ՂԱ-ԱՆԾ
ՄԵ	Յ	Յ-	Կ	Կ	Կ	Յ	Մ

## Consonant and Vowel Marks

Dots can be added above letters to indicate a stressed vowel or consonant using “CTRL + .”. For example:

**አበ** CTRL . ⇒ **አበ** (“abaa”, “a” is stressed)  
**አበ** CTRL . ⇒ **አበ** (“abba”, “b” is stressed)  
**አበ** CTRL . ⇒ **አበ** (“abbaa”, “b” and “a” are stressed)

# Typing Punctuation

## Ethiopic Punctuation

:	#	;	;	-	,	*	#
:	. / ::	,	;	-	,,	:+	#

<	>	«	»
<	>	<<	>>

Period, ‘.’ may also be used to enter ‘::’. When a number follows ‘:’ and ‘::’ they will change back to their Latin form automatically. For example:

123:456 ⇒ 123,456  
12::50 ⇒ 12.50

## Keyboard Punctuation

All regular punctuation on your keyboard remains available. Most punctuation can be typed with a single keystroke as usual. Those used to input Ethiopic symbols can be entered by hitting the punctuation key two or more times until it appears.

# Typing Numbers

The hash mark is used Ge'ez numbers, so #1 becomes ﬂ and so on. When a '#' is needed before a number in your document, just type # twice.

## Ethiopic Numerals

<b>đ</b>	<b>ě</b>	<b>ř</b>	<b>ø</b>	<b>č</b>	<b>ž</b>	<b>ž</b>	<b>ť</b>	<b>đ</b>				
#1	#2	#3	#4	#5	#6	#7	#8	#9				
<b>í</b>	<b>ă</b>	<b>ă</b>	<b>ą</b>	<b>ę</b>								
#10	#20	#30	#40	#50	#60	#70	#80	#90	#100	#1000	#10000	#100000

Numeral composition will continue as 0s are entered up to **ffff** (100,000,000).

The “connected” style of Ethiopic numerals can be created by changing the font from “Abyssinica SIL” to “Abyssinica SIL (Connected)” as seen in the following table:

Abyssinica SIL	Abyssinica SIL (Connected)
፩፭፻፪፮፮	፩፭፻፪፮፮
