

Typing in Tigrinya (Eritrean Conventions)

The Tigrinya keyboard (ቶ) provides *only* the letters used in modern Eritrean Tigrinya. It uses a system whereby the Tigrinya sounds are matched to the English letters (a style called “phonetic”). You can think of how a word sounds in Tigrinya and then type it out with English.

Example: typing **selamat** becomes ሰላማት

Because Tigrinya has more sounds than English we sometimes have to adjust this rule. For example English does not have ‘ጸ’ or ‘ቐ’ and the closest similar letters would be ‘s’ and ‘q’ respectively. In this case you should type with “capital S” and “capital Q”:

Example: typing **SbuQ** becomes ጸቡቕ

When the letter you want to type does not appear when you hit the similar sounding key in English, try using the capital next. If typing the capital does not work, then try hitting the key two times:

Example: typing **aarbi** becomes ኅርቢ

Next, when you need to type the extra letters of Tigrinya like ሷ: ሸ: ኸ you can do so by typing an extra vowel after a ‘u’:

Example: typing **mua** becomes ሸሷ

Example: typing **guie** becomes ኸኸ

Finally, we must introduce a special rule for ‘ (apostrophe). Some words are spelt with a ሷጵስ (6th) letter followed by a vowel, like ርኤ in ንብርኤል. We use the apostrophe here to type “gebr’iel” to make sure we get “ርኤ” instead of ‘ሬ’.

Example: typing **wag’u** becomes ዋግኡ

Example: typing **T’uum** becomes ተዑዎ

The following typing tables show how to type all Tigrinya letters, numbers and punctuation.

Consonant and Vowel Marks

Dots can be added above letters to indicate a stressed vowel or consonant using “CTRL + .”. For example:

- አሳ CTRL . ⇒ አሳ̇ (“abaa”, “a” is stressed)
- አሳ̇ CTRL . ⇒ አሳ̇ (“abba”, “b” is stressed)
- አሳ̇ CTRL . ⇒ አሳ̇ (“abbaa”, “b” and “a” are stressed)

Typing Punctuation

Ethiopic Punctuation

:	፡	፤	፥	፦	፧	፨	፩	፪
,	::	;	::	:-	,,	??	:+	:#

Period, ‘.’ may also be used to enter ‘፡’. When a number follows ‘:’ and ‘፡’ they will change back to their Latin form automatically. For example:

123:456 ⇒ 123,456

12፡50 ⇒ 12.50

Keyboard Punctuation

All regular punctuation on your keyboard remains available. Most punctuation can be typed with a single keystroke as usual. Those used to input Ethiopic symbols can be entered by hitting the punctuation key two or more times until it appears.

Typing Numbers

The hash mark is used Ge’ez numbers, so #1 becomes ፩ and so on. When a ‘#’ is needed before a number in your document, just type # twice.

The “connected” style of Ethiopic numerals can be created by changing the font from “Abyssinica SIL” to “Abyssinica SIL (Connected)” as seen in the following table:

Abyssinica SIL	Abyssinica SIL (Connected)
፲፱፻፲፱	፲፱፻፲፱
