

# Lushootseed Unicode Keyboard 1.1

## Overview

### Design

This Keyman keyboard is designed for Lushootseed, a language of the Pacific Northwest spoken in Washington state.

The arrangement of Lushootseed letters on this keyboard closely follow the arrangement of keys in a standard English QWERTY keyboard.

### On Screen Keyboard

This keyboard includes an On Screen Keyboard view for easy reference. The On Screen Keyboard works best when associated with a QWERTY US layout.

### Fonts

This is a Unicode keyboard and works with any Unicode font which has support for Lushootseed characters. Common fonts which work with Lushootseed are:

- Arial
- Arial Unicode MS
- Calibri
- Cambria
- Consolas
- Courier New
- Tahoma
- Times New Roman

This keyboard also includes the following fonts which work well with Lushootseed:

- Lushootseed Sulad
- Lushootseed School
- Gentium Plus

## Keyboard Layout

### Lushootseed Unicode: Shifted

## Keyboard Details

You can find most keys on the Lushootseed keyboard by thinking of a similar letter in English.

**Example:** type **s a C e b** to get **sacəb**.

**Example:** type **s u P q s** to get **supqs**.

You can find letters with <sup>w</sup> and <sup>’</sup> by using **Shift**:

**Example:** type **X V i ; q s** to get **x<sup>w</sup>ciłqs**.

**Example:** type **: u Z : u Z** to get **xu<sup>w</sup>xu<sup>w</sup>** .

Type **Backspace** to delete any letter.

**Example:** type **G** gives **g<sup>w</sup>**. Typing **G** + **Backspace** removes the entire letter.

**Example:** type **E** gives **ǵ<sup>w</sup>**. Typing **E** + **Backspace** removes the entire letter.
