Assamese (Sabdalipi) Keyboard Help

Keyboard © 2009 TI Trade and Tavultesoft

Overview

This keyboard is designed for the Assamese language. It is a phonetic keyboard, which means the characters are arranged according to the letters of the English keyboard.

Most computers will automatically download a special font if needed to display this language correctly.

Full Documentation

The Sabdalipi Assamese keyboard uses a phonetic-style layout, so that the key sequence for each Assamese (Unicode) character is usually the similar sounding English character, for example:

k is ক, g is গ, p is প and so on.

Similarly uppercase characters are used for the deep sounding characters, for example:

K is খ, G is ঘ, P is ফ and so on.

The plus '+' sign is used to create juktyakhars, for example:

typing 'l+p' would result in প্ল

typing 'j+j+b' would result in জ্জ্ব

A special key is reserved for all kaar jogs, for example:

a stands for Aakaar

u stands for Ukaar, i.e pu gives পু, ru gives রু and gu gives গু

y stands for rhokaar, i.e gy is গ্য, ty is ত্য and ky is ক্য

The keyboard layout and kaar jogs are shown below.
